

Morphy Richards Electric Blankets

If you're looking to cut energy costs this winter while staying warm, consider buying a Morphy Richards electric blankets. There are benefits to electric warming blankets that you don't get with regular blankets. Electric blankets are adjustable, and some have as many as ten different heat settings. By using your heated blanket at night and turning down the thermostat approximately 10 to 15 percent overnight you may notice a savings on your heating costs. There are plenty of manufacturers who make electric king size blankets, such as Morphy Richards.

Morphy Richards's Electric blankets

provide comfort set digital controls, 10 hour automatic shutoff for safety, a preheating function and dual heating controls on both sides. This is a feature only available with the Morphy Richards King size electric blankets, which is another advantage. With dual controls you and your partner can customize the heat on your respective sides of the blanket. For example you may prefer high heat while your partner prefers low heat or no heat -- with this blanket it is possible for both of you to be comfortable.

This Morphy Richards Blanket is a miracle. It is still a pleasure to feel its soft warmth. It's a fully fitted elasticated skirt, an overheat protection, an illuminated display light temperature and a washable fleece heated mattress cover. The wiring in the mattress is so thin that you never even realize that its there. However its best feature is that it enables each person to control the temperature on his side of the blanket.

The Super King Dual Washable Fleece Heated Mattress Cover is a fantastic way of guaranteeing a warm and cosy nights rest. The fleece material is extra thick and contains ultra-thin wires ensuring ultimate comfort so there's never any discomfort however sensitive you are. Comes with a 3 Year Manufacturers Warranty
